

Fourth International *Horticulture Research* Conference

16-20 July 2017
East Malling, United Kingdom
www.hortres-conference.org

Bringing together international researchers conducting fundamental research on horticultural crops, to showcase the latest research findings and to network with colleagues from around the world.

- Genome engineering in horticultural crops
- Fruit development, functional food and quality
- Flowering and environmental adaptation
- Precision horticulture
- Root–shoot interactions and grafting
- Plant–microbe, insect and environment interactions
- Post–harvest biology
- Evolutionary biology and comparative genomics
